

1. Improved script editor
 - ▶ Allows multiple instance of batch edit
 - ▶ Captures the command trails only when the recorder function is activated
 - ▶ You can still edit your batches while you are still executing the commands
2. Command Results with formatting and drill down
 - ▶ Command results are now displayed in formatted text for easier viewing
 - ▶ With hyperlinked command results, you can drill down to records that correspond to the value.
 - ▶ Using the pushpin feature to keep a command results tab in the display area in addition to subsequent results of the same command.
3. Crystal Software users can send ACL output to Crystal Reports through the Crystal Reports feature on the Data menu.
4. Manage all table properties (index and views) under just one dialog box.
5. All new ACL interface
 - ▶ Project Navigator — Comprises of Overview tab and Log tab. Overview tab allows you to organise items in your ACL project files
 - ▶ Welcome Tab — Faster and easy way to navigate between your projects through list of hyperlinks. Added hyperlink access to ACL online support.
6. Log History
 - ▶ It is now organized chronologically in set groupings – Last 7 days, 8 to 14 days ago, 15 to 30 days ago, and over 30 days.
 - ▶ In each chronologically grouping, log is subdivided into sessions.
 - ▶ Allows export of entries to HTML, a log file, a script, WordPad, a text file, or the clipboard.
7. Folder Concepts
 - ▶ Use folders to manage project items (E.g. Tables and Script)"
